Career Objective

Experienced and dynamic Computer Programmer with one year experience effectively managing software development projects from conception to completion. Utilizing various programming languages and technologies to enhance system performance and overall company efficiency.

Additional Skills

- Proficiency in Programming Languages
- Software Development
- Problem-Solving
- Code Debugging
- Collaboration Skills

Work Experience

2024 - 2025
Bureau of Animal Industry

>NET MAUI Developer

- Created a mobile application featuring functionalities such as Pet Registration, Animal Registration, Animal Disease Incident Reporting, and Population Surveys.
- Implemented a .NET Core Web API for streamlined data management. Collaborated closely with cross-functional teams to ensure the application's seamless integration with existing systems, enhancing user experience and operational efficiency.
- Conducted thorough testing and debugging to identify and resolve issues, resulting in a robust and reliable application.
- Provided training and support for end-users to facilitate smooth adoption of the new system, contributing to increased productivity and user satisfaction.

Education

2019 - 2025
Asian Intistute of Computer Studies

Bachelor of Science in Computer Science

I developed a facial recognition system for my thesis utilizing Python. This project involved designing algorithms capable of identifying and verifying individual faces with high accuracy. I employed various libraries and tools, such as OpenCV and TensorFlow, to build and train the model.

Certifications

2025

API Development Training

Information and Communications Technology Service (ICTS)

2023

Kodego Bootcamp for Full-stack Web Development

Kodego
